

WHY SHOULD I BUY A WATER SOFTENER?

It saves money by preventing costly scale build-up in your household plumbing and fixtures. It reduces the energy cost for heating water and prolongs the life of water-using appliances. Water softening cuts the cost of cleaning supplies by up to 75%. It helps keep your showers, sinks and commodes clean. Clothes washed in soft water last up to 30% longer. Soft water is better for your hair and skin.
