

Announcing the beginning of a culinary revolution. Pascal brings convenience and safety to your kitchen through its hands-free functionality. Developed for the cooking enthusiast, this electronic, pull-down faucet helps eliminate the spread of germs and bacteria throughout the prep area. A touch-sensitive spout and handle allow you to keep the water at a constant temperature and pressure from use-to-use. This smart technology is more than a water source, it's a tool for the chef.

FEATURES

Pascal Culinary Faucet with Smart Technology:

(Model #64901-SS on front)

Hands-free functionality:

- Seamlessly activates the water flow without touching the faucet
- Reserves both hands for efficient cooking prep and clean-up
- Eliminates the spread of bacteria to the faucet after handling raw foods
- Conserves water and energy by only turning on the water when needed
- Allows conversion to full manual mode

Touch-sensitive spout and handle:

- Starts and stops the water flow with just a light touch to the spout or handle
- Provides efficiency of motion during food preparation
- Maintains a selected water temperature and pressure

Pull-down, two-function spray head:

- Twist-and-lock feature securely fastens spray head to spout
- Quickly switches from stream to spray with the two-function diverter
- Extending the pull-down spray head automatically turns water on, retracting it turns water off

High-arc spout design:

- Ample clearance for all pots, pans and other cooking tools

LED Mode Indicator:

- Instantly lets you know what mode the faucet is in
- A blue light indicates the hands-free feature is on and active
- A red light indicates when it is time to change the batteries
- No light indicates the faucet is in the manual mode

Two-hole installation: spout and valve only

Three-hole installation: spout, valve and soap dispenser

Under-sink mounted control can run on either AC or battery power

Batteries will last a minimum of 18 months
